CLASS-9th

Project Lay out-Subject wise-Instructions for the Project

By paper folding activity to show that the line segment joining the midpoints of any two sides of a triangle is parallel to the third side and equal to half of it (Mid Point Theorem).

For making this activity you have to arrange:

Colorful paper, white sheet of paper, a pencil, ruler, pair of scissors and glue stick.

Description: use your activity note book for doing this activity. Draw a triangle ABC and take the measurement of the side according to your convenience. Take side BC as base and find the midpoints of side AB and AC by folding the paper along its sides. Now fold the triangle along the midpoints E and F of the side AB and AC respectively. Now cut out the triangle along EF and paste it over AB where vertex E lies on A. Now compare the side AB with EF.
