Project Lay out-Subject wise-Instructions for the Project

- Activity 1 : Compare any two fractions by cutting and shading rectangular strip of same size divided into as many parts as the denominator.
- Follow the following steps: (for your reference)
 - Step 1:** Take two fractions $\frac{2}{9}$ and $\frac{5}{7}$
 - Step 2:** Make two rectangular strip of paper by cutting from a colorful sheet.
 - Step 3 :** The first rectangle now represents the fraction $\frac{2}{9}$ and the second rectangle represents $\frac{5}{7}$. (showing the fraction by shading the no of boxes in numerator)
 - Step 4:** We can compare the fractions by observing the colored part.
 - Steps 5:** whichever rectangle has a greater colored part that fraction is greater.

Follow the same steps and compare the fractions $\frac{2}{3}$ and $\frac{8}{12}$ (write the steps also)

- Activity 2:- Represent $\frac{1}{2}$, $\frac{1}{3}$, $\frac{1}{6}$, $\frac{1}{8}$, $\frac{5}{6}$, $\frac{7}{9}$ in your Maths Application Notebook. For your reference picture is given below.

6 ACTIVITIES FRACTIONS on a number line

Note : Do the activity in maths application notebook.
