SUMMER VACATION ASSIGNMENT

6

Date of Submission

22-06-2026

Session: 2026–2027

Teacher's Note

Dear Parents,

Teachers and parents both play an equally important role in shaping a child's learning journey. At school, teachers guide, support, and nurture students by helping them understand concepts and develop essential skills. At home, parents observe, encourage, and reinforce these learnings, creating a balanced environment for growth. This strong partnership between school and home ensures that students feel supported, confident, and motivated in all aspects of their education.

Keeping this in mind, holiday homework has been thoughtfully designed to help students remain connected with their studies during the summer break. It provides an opportunity for children to revise what they have learned, apply their knowledge in practical ways, and reflect on their understanding. Through these activities, students can explore their creativity, strengthen their skills, and become more independent learners. With your continued support and encouragement, we hope this vacation will be both enjoyable and enriching for your child.

1. Do all the questions given in holiday homework pdf supplied to you in your group in ICT notebook.

PROJECT WORK (GIVEN BELOW):

Take the mini printout of all the answers of below given questions, cut them if required and paste them in your copy. You may make any changes to the below given table that suits your need.

Roll No	Student Name	Class	Marks
1	Aditi	VI	78
2	Rahul	VI	92
3	Aman	VI	65
4	Priya	VI	88
5	Rohan	VI	45
6	Neha	VI	73
7	Karan	VI	55
8	Pooja	VI	81

Sorting Questions

1. Sort the data in **ascending order of Marks and display the result.**
2. Sort the data in **descending order of Marks and display the result.**
3. Sort the data **alphabetically by Student Name and display the result.**

Filtering Questions

1. Apply filter to show students who scored **above 80 marks and display the result.**
2. Filter students who scored **below 60 marks and display the result.**
3. Display only students named starting with letter 'P' and **display the result.**

AutoFill Questions

1. Use AutoFill to create numbers from **1 to 15** in a column and print

the result.

2. Use AutoFill to fill days of the week and print the result.
3. Copy a formula using AutoFill to calculate total marks (if more subjects are added) and print the result.

Conditional Formatting Questions

1. Highlight marks **above 80** in **green color** and **print the result**.
2. Highlight marks **below 50** in **red color** and **print the result**.
3. Apply **data bars** to show comparison of marks and print the result.

Application-Based Questions

1. Why is sorting important in Excel?
2. How does filtering help in analyzing data?
3. Give one real-life example of AutoFill.
4. How does conditional formatting make data easy to understand?

Practical Activity

- Create the above table in Excel
- Apply:
 - Sorting
 - Filtering
 - AutoFill
 - Conditional Formatting
- Take a printout or screenshot for submission
